

RAJIV INTERNATIONAL SCHOOL, MATHURA

MY FUN WORK

CLASS-L.K.G

(for this summer 2020-21)

Dear Parents,

Kindergarten classes are the classes where kids gain confidence by attaining perfection in both , fine motor skills and gross motor skills. Most of the kids don't face problems with gross motor skills- such as running or jumping- but face difficulty in mastering the fine motor skills such as coloring, sorting , matching or writing. It is important to make sure your child is continually improving these skills. Here are some educational activities to try at home to build up fine motor control.

This game is both educational and fun for younger kids. The game exercises the child's listening abilities by compelling them to concentrate.

## **1. Listening game**

### ***You will need:***

- A lot of miscellaneous items that have a distinct sound

### ***How to:***

1. Collect items such as combs, vessels, remote, books, pens, bottles, toys, clocks, etc., which have unique sounds.
2. Place the items on the table and ask the child to make a mental note of them.
3. Take the items away and ask the kid to turn the other side or close his eyes.
4. Pick an item and make a sound with it. If the child guesses it correctly, he scores a point.

### **Quick Tip:**

You could use a blindfold to make sure the kid is not peeking!

## **2. Pitching pennies**

Pitching pennies is a cool game to develop the child's hand-eye coordination. Similar to beer pong, the game is for the entire family.

### ***You will need:***

- Pennies or other small currency coins
- Plastic or paper drinking cups (large size)

### ***How to:***

1. Each child gets five coins. A cup is placed on a table or a chair in front of them.
2. Ask the child to take 'x' steps away from the cup, where 'x' is his or her age. Adults can move five steps farther than the children to throw the pennies.
3. The child has to toss the coins, one at a time, into the cup.
4. The child who puts in most coins in five chances wins.

## Quick Tip:

You can replace coins with marbles or even ping pong balls.

### 3. Make your own story

Another way to boost your child's creative abilities is to make them tell you a story.

#### *You will need:*

A few ideas for storytelling

#### *How to:*

1. If you have older kids, pick a theme and ask them to tell you a story.
2. With younger kids, start a story and ask them to continue it midway. That will give them some footing and also ideas for a plot.

## Quick Tip:

Your kid's stories may not always make sense. But don't stop them or correct them. Let them weave the story as they want. After all, it is fiction and need not be true.

Sometimes, children's stories could be things that have actually happened to them. Read between the lines and talk to them if necessary, to figure out if it is just their imagination or reality.

Circle the odd one out .

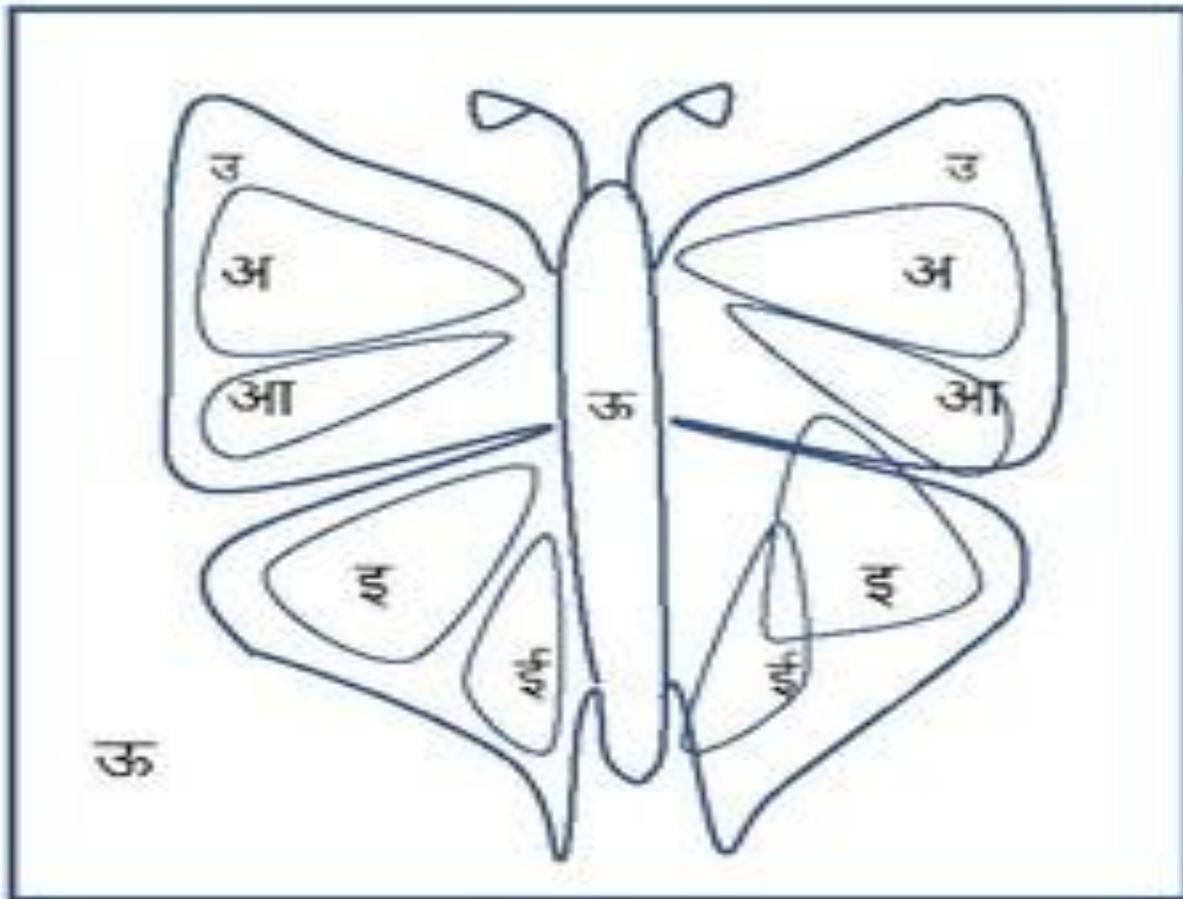

a	a	d	a	a	a
c	c	c	c	e	c
b	b	a	b	b	b
e	e	e	e	e	b
d	d	d	b	d	d

Colour the butterfly using key below.

### Hindi Vowels

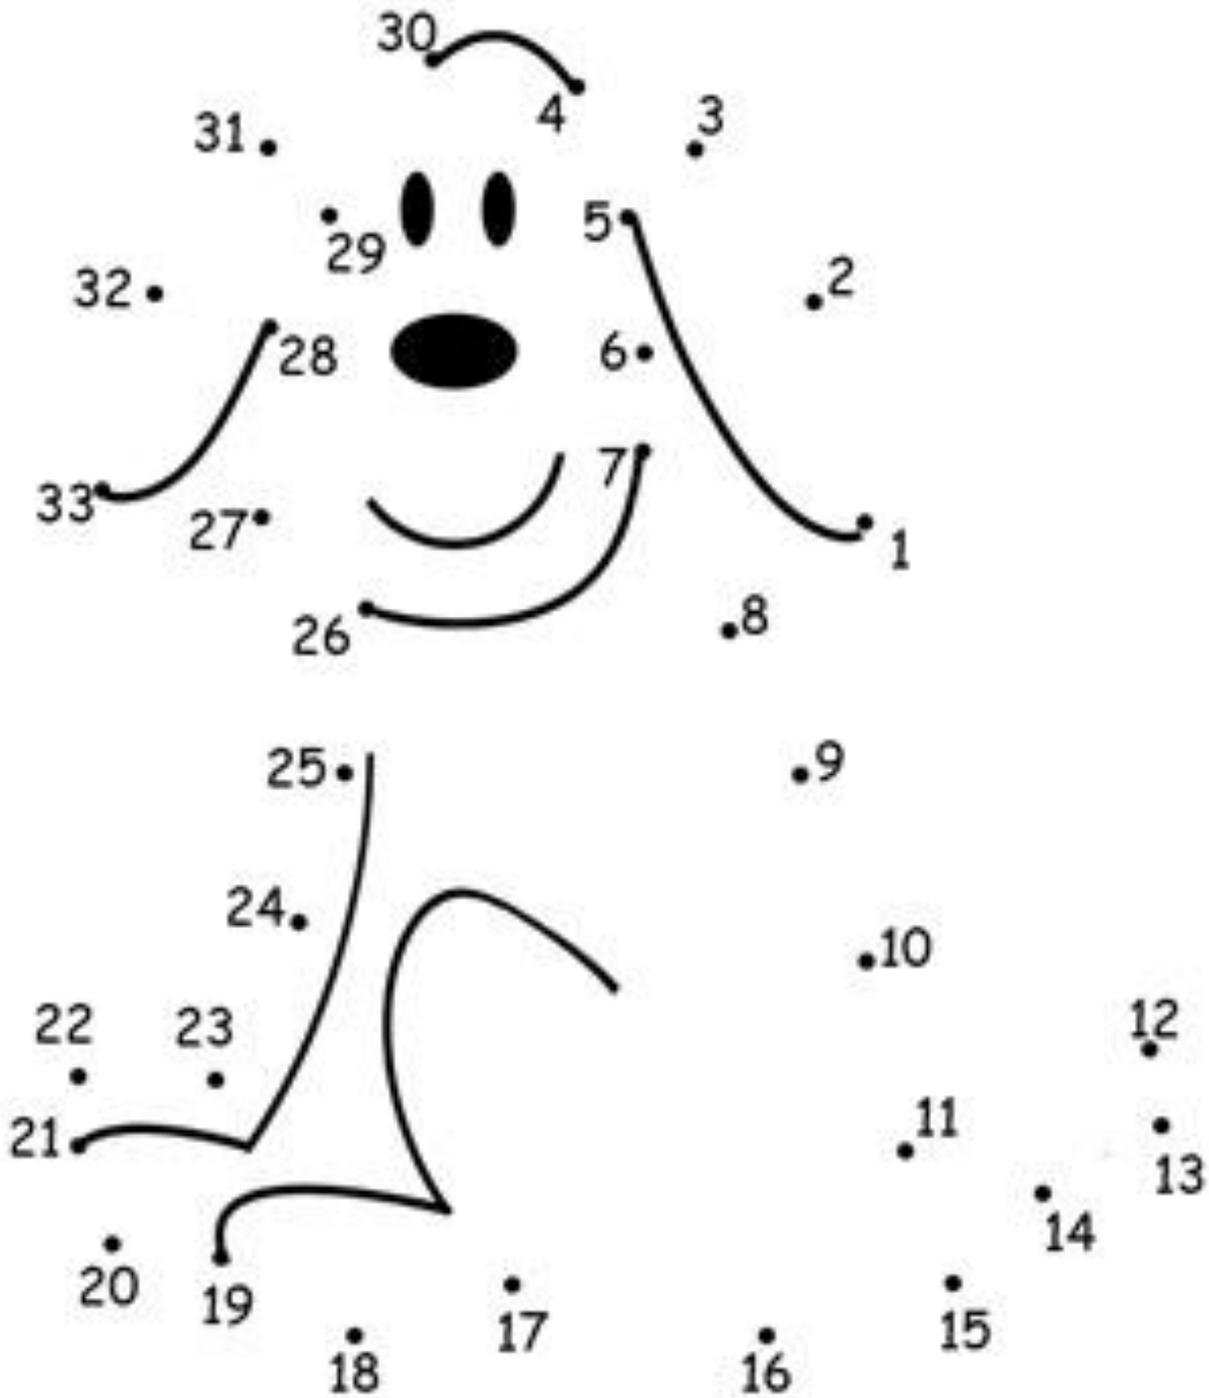

Color using the key below.

अ	Yellow	आ	Light Yellow	उ	Red
आ	Orange	इ	Light Green	ऊ	Blue

Connect the dots in order.

Draw a line from each word to the correct part of the body.

Head

Nose

Stomach

Chest

Fingers

Leg

Mouth

Hand

Arm

Neck

Toes

Foot

Name \_\_\_\_\_

Count the number of animals in each box and write the total number inside the square box.

A rectangular box containing four rabbits. Three are in the top row and one is in the bottom left. To the right of the rabbits is a square box for writing the total count.

A rectangular box containing five lions. Three are in the top row and two are in the bottom left. To the right of the lions is a square box for writing the total count.

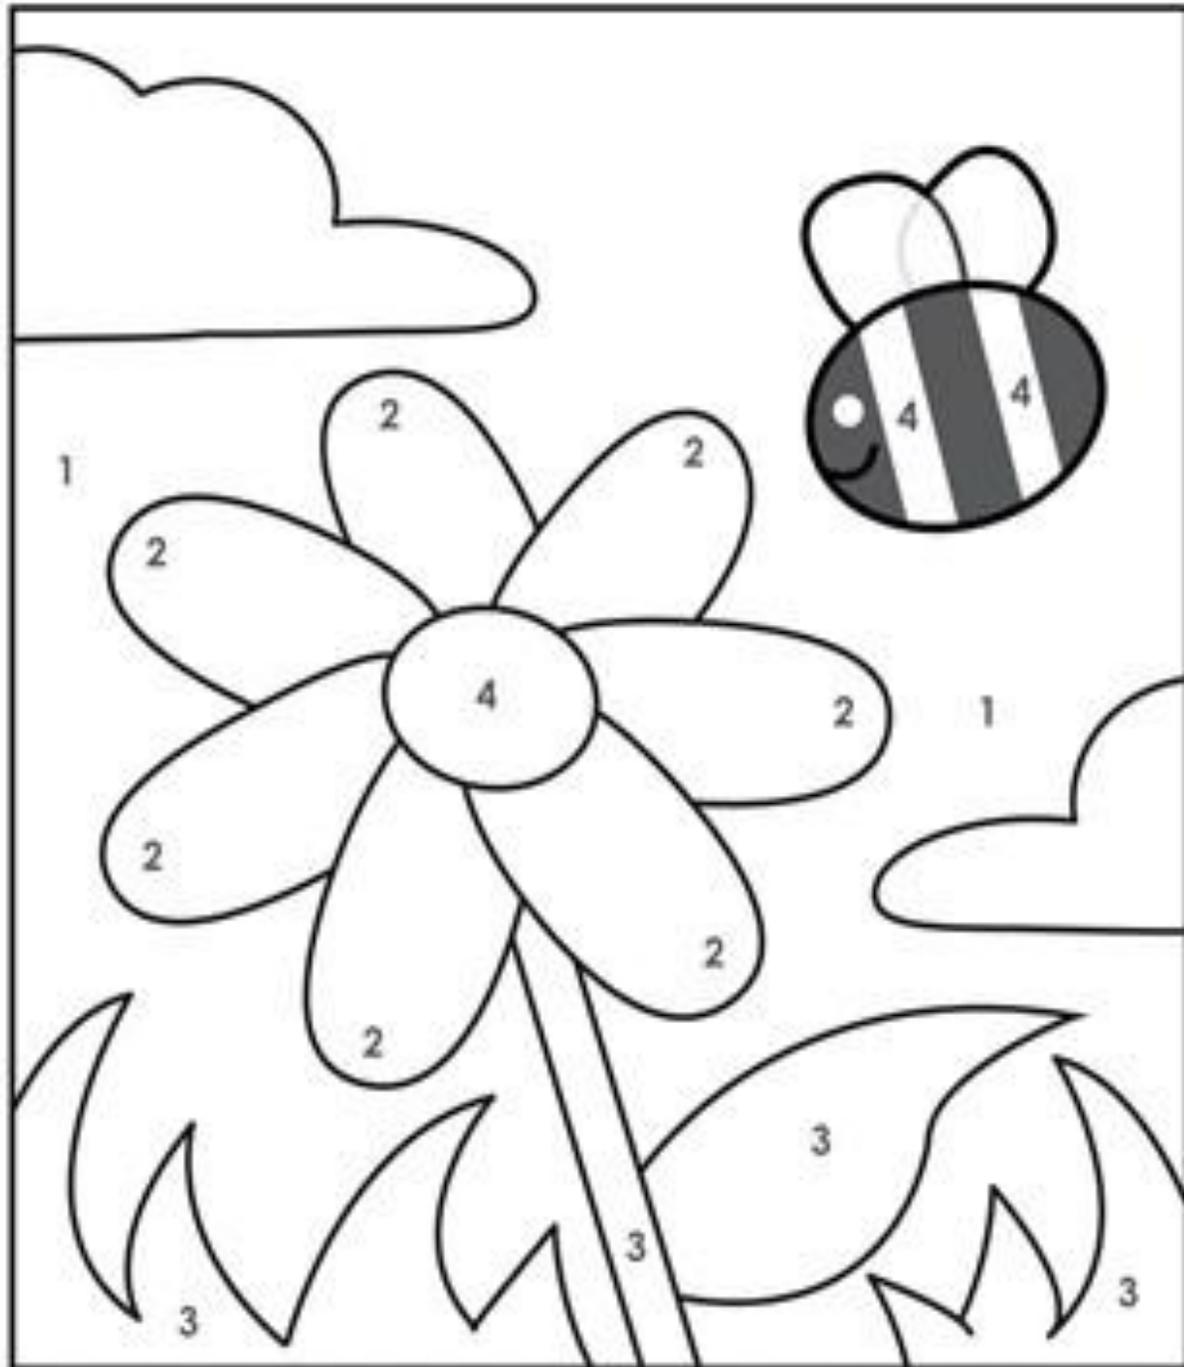

A rectangular box containing six giraffes. Five are in the top row and one is in the bottom left. To the right of the giraffes is a square box for writing the total count.

A rectangular box containing eight monkeys. Five are in the top row and three are in the bottom left. To the right of the monkeys is a square box for writing the total count.

A rectangular box containing eight squirrels. Five are in the top row, three are in the middle left, and one is in the bottom left. To the right of the squirrels is a square box for writing the total count.

A rectangular box containing ten hippos. Four are in the top row, three are in the middle left, and three are in the bottom left. To the right of the hippos is a square box for writing the total count.

Colour the picture by using colour codes.

### Color by Number

1 - Blue

2 - Purple

3 - Green

4 - Yellow

**Paper tearing and pasting**

1. Cut a flower out of coloured paper and paste in the space provided.
2. Cut a circle out of white paper and paste on the flower.
3. Ask the child to tear paper of various colours and paste on white circle.

## Blow painting

- 1.** Have your child choose a colour and dribble a bit onto his/her paper.
- 2.** Give a straw and let the child experiment with blowing the paint around the paper. Continue adding the colors until the child completes the masterpiece.
- 3.** Allow the painting to dry and then encourage the child to write his/her name in the bottom corner.

**"Have a nice summer vacation. Remember you must enjoy them as much as you  
can, they will never last forever.**

**And remember that we, RISITIANS love you very much!"**

*HAPPY HOLIDAYS!*

*STAY HOME, STAY SAFE...!!!*
